

## Our Partners

**AIT's world-class open university undergraduate and postgraduate degree programs are delivered in collaboration with our international partner universities including: the Open University of Malaysia (OUM) and the Banasthali University, India**

**The Open University of Malaysia (OUM). Malaysia--- The OUM was set-up by a Consortium of eleven (11) Malaysian Public Universities. It has a student population of close to 80,000 and offer programs (using the open learning mode of delivery) in management, business administration, education, information technology, software engineering, civil engineering, mechanical engineering, electrical and electronic engineering among others at all levels including: Diploma (two years), Bachelor's degree (4 years), Master's degree (2 years) and PhD (4 years).**

**OUM adopts the motto "University for All" which is consistent with its philosophy on democratization of education. This philosophy underlies the belief that: education should be made available to all, regardless of time, place, age, social and economic background. OUM has entered into an institutional partnership with AIT and the two institutions have signed a comprehensive partnership agreement to enable AIT deliver OUM's undergraduate and postgraduate (graduate) programs in Ghana and in the West African sub-region. Students registered on the OUM programs will be awarded OUM degrees.**

**Banasthali University ( BU ), India--- Banasthali University established in 1935 is an accredited premier university in India which emphasizes on**

**all-round development of students and offers academic programs in all faculties namely: Arts, Science, Humanities, Fine Arts, Management and Computer Engineering at undergraduate to post-graduate levels:. AIT and BU have entered into a broad-based institutional partnership agreement to enable AIT deliver BU's undergraduate and postgraduate (graduate) programs in Ghana and in the West African sub-region. Students registered on the BU programs will be awarded BU degrees.**
